The Makers Empire 3D Design Program

An all-in-one solution for effective planning, teaching & assessment

Why?

Design Thinking underpins learning in Design & Technology curriculum. Primary and elementary school teachers are being increasingly required to teach Design Thinking by integrating contemporary technology to address curriculum demands.

Teaching young students Design Thinking helps them develop 21st century learn skills - Critical Thinking, Creativity, Collaboration and Citizenship - and enhance innovation.

The Program

Makers Empire 3D App – the world’s most fun and easiest to use 3D design software.

Teacher Dashboard – effective planning, class management, and assessment tools for easy implementation.

3D printer bundles, advice, and support.

"I love how it's the whole package. It's the software, it's a well thought out curriculum and it's the printers all in one package."

Joel Aarons, STEM teacher
